Restoration to entry of lands in National Forest Reserve. Notice is hereby given that the lands described below, embracing 370.86 acres, within the Toiyabe National Forest, Nevada, will be subject to settlement and entry under the provisions of the homestead laws of the United States and the act of June 11, 1906 (34 Stat., 233), at the United States land office at Carson City, Nevada, on May 2, 1912. Any settler who was actually and in good faith claiming any of said lands for agricultural purposes prior to January 1, 1906, and has not abandoned same, has a preference right to make a homestead entry for the lands actually occupied. Said lands were listed upon the applications of the persons mentioned below, who have a preference right subject to the prior right of any such settler, provided such settler or applicant is qualified to make homestead entry and the preference right is exercised prior to May 2, 1912, on which date the lands will be subject to settlement and entry by any qualified person. The lands embrace a tract of 40.05 acres within unsurveyed but what will probably be, when surveyed, Secs. 21, 27 and 28, T. 10 N., R. 45 E., M. D. M., described by metes and bounds as follows: Beginning at corner No. 1, a granite boulder marked F.S.M. SACRAMENTO, March 22.—The

Southern Pacific company has decided that northern California must be thickly settled, and that this condition must be brought about without delay, even if it is necessary for that company to haul settlers free of charge. The company is planning for the greatest campaign of publicity for immigration purposes that it has ever attempted, or that has ever been attempted on behalf of any portions of California.

This information was brought from Chicago the other day by Frank Snook of this city, who has been there in conference with R. D. Williams, a prominent official of the Southern Pacific company's immigration department. Williams told Snook that the company is now preparing for the greatest traffic of homesteaders to northern California that it has ever carried.

Every new settler brought into the Sacramento valley or any other agricultural district of northern California is looked upon by the Southern Pacific as worth to it a fraction more than \$83 per year, and it proposes to bring thousands from the eastern and middle western states to thus increase its earnings.

This section of the state is looked upon as the most suitable for settlement at this time, for the reason that abundant good land is offered at a cheap figure, whereas the small savings of the average middle west farmer cannot buy him a sufficient amount of land at the high figure demanded in southern California.

As values here are rapidly advancing with the present rapid settlement of the valley it is considered wise to hurry the company's plans to get the best prices for those it brings here.

The greatest difficulty encountered according to Williams' statement to Snook has been that of convincing would-be settlers of the truth of the claims made for this end of the state as to climate and productiveness, even when conservatively stated.

The northern end of the state is to be boosted now in preference to the south, because so many intending settlers going there have found their funds too small to start them and have returned east to stay, depriving the company of the gains it would make had they remained and preventing others from coming.

Within a short time the company will begin landing trainloads of settlers in Sacramento and other valley cities, and will have its various agents with their to aid them in getting properly located.

COPPER MARKET IS AT
PRESENT AT TOP NOTCH

The price of copper metal is 14 5-8 cents a pound, but some sales are reported at 14 3-4 cents. While the demand is not so great as to cause any immediate apprehension, the selling agencies are still able to dictate the price and could easily get 15 cents a pound if they desired. The fact that producers are still anxious to divert any move that might have a tendency to create anything like a runaway market. All are satisfied with existing prices and do not want the price to move up to a figure that will prevent the general use to which the metal has been put during the low market period.

COMMERCIAL RATES

CONTRACTS MADE IN STATE

SAID TO BE IN EXCESS OF
5,000,000 POUNDS.

Wool buyers have been exceedingly active during the past week or two and it is authoritatively given out that the contracts thus far made in the state are far in excess of 5,000,000 pounds. The average price so far as can be ascertained, for there were many secret contracts, was in the vicinity of 15 cents, making a total valuation thus far contracted for of about three-quarters of a million dollars.

It will be at least two weeks before all contracts are signed and the ultimate will reach well within the seven figure limit.

Meantime arrangements are being made for the shipment of lambs to the eastern market.

It is difficult to compute the value of the lamb crop, but when it is supplemented by the muttons that are also sent to the shambles there will be another cool million or two to add to Nevada's products for the year.

LUCKY OLD PEOPLE

Have Seen Wonderful Progress from
Ox-Carts to Aeroplanes.

What wonderful progress the old people of today have lived to see. In their young days the railroad was as much of a novelty as the aeroplane is now, and nearly everything else has progressed as much.

Another modern idea is that people may be active and vigorous at 75 or 80 years if they will be careful to keep up their strength.

Ms. Jno. N. Kelly, aged 75, who lives at Lake Charles, La., says he was badly run down from overwork, and took two or three bottles of Vinol by advice of his druggist. He is now better than for the past ten years and actually feels fifteen years younger.

There is certainly nothing like Vinol our delicious cod liver and iron preparation, to build up and keep up all weakened, run down persons. It is especially good for old people too, because it is very pleasant to take and agrees with the stomach. There is no cod liver oil in Vinol. We guarantee it to give you perfect satisfaction. WORK PROGRESSES RAPIDLY
AT LAHONTAN DAM

The Lahontan dam work is now proceeding along in a highly successful manner with a working organization that is harmonious and perfect in all its details. About 230 men are now employed in the various departments, and the monthly disbursements total around \$40,000, the chief item, of course, being labor. Good progress has been made on the cutoff trench, which has been completed across the river bed, and after being dug to a depth varying from 30 to 42 feet, grouting was inaugurated at a depth of from 60 to 72 feet. Under this process liquid cement is being forced into the rock fissures under an air pressure of 100 pounds. Good success is being had in filling these fissures, and when the present work is completed the bedrock upon which the dam is to rest will be a solid mass of rock and cement, wholly impervious to water.—Fallon Eagle.

SOMETHING ABOUT MEASLES.

"An ounce of prevention is worth a pound of cure." Measles can and should be prevented in most cases. The way to prevent the spread of the disease should be clear. Avoid all contact with those persons who are sick or with persons or objects coming in contact with such patients. When a case of measles does appear in any family, that family should isolate such patient from the earliest symptoms recognized until a week or ten days after all swelling and other symptoms have disappeared. On the nurse or person attending the patient should enter such room.

EMPEROR NOT PAID.

T'EN T'EN, March 22.—President Yuan Shi Kai has been obliged to postpone the payment of the former emperor's monthly pension, owing to the lack of funds.
